#### SUSP. SENTENCE OF ONE YEAR IN EGSTROM CASE

Attempted Suicide Case Is  
Heard Before Judge  
MacDonald

In district court sitting held on Wednesday and at which Judge A. M. MacDonald presided, the case of Nels Engstrom, charged with attempted suicide was heard. It will be recalled that Engstrom allegedly attempted to take his life at Rose Lynn, some weeks ago. At the preliminary hearing held before Magistrate Roberts he was committed for trial and on being found guilty, a suspended sentence of one year was imposed by Judge MacDonald. Engstrom was given his freedom upon a bond of \$1,000 on his own recognizance.

Phyllis B. Luck school teacher, brought suit against Stinson school district No. 2615 claiming right of contract. Miss Luck sued for the sum of \$100 alleging that she had been engaged, and that the school district had later failed in the contract. The court found against the plaintiff. Van Allen & Clement of Edmonton, represented by C. A. Coughlin of Hanna appeared for the plaintiff, while W. N. Orburn represented the defence.

Four naturalization applications were accepted. Date of next court sittings has been set for December 12.—Hanna Herald

#### COSTLY EXPORTS OF CHEAP FRENCH WHEAT

It costs the French government \$1.50 for every bushel of wheat exported, according to information from Britain, where resentment has been aroused by imports of French wheat. France has exported 100,000 tons so far this season, it is claimed, and lost over \$6,000,000 in the process. This amount is arrived at by deducting the price received in foreign markets from the price paid the French growers by the government. French wheat competes with domestic wheat in Britain and also with the soft wheats of Australia and Argentina, and even affects the price levels of Canadian hard wheats.

**NEW DAIRY OFFICIAL**  
Announcement is made of the appointment of W. C. Cameron, B. S. A. Calgary to the position of chief inspector and instructor on the staff of the provincial dairy branch under Dairy Commissioner J. R. He is a graduate of the University of British Columbia, and has been engaged in government grading work in Saskatchewan and Alberta for some time. More recently he was superintendent of branches for the Central Creameries Calgary.

#### SWEDISH RECOVERY ADVANCED BY CO-OPERATION

Sweden has recovered from depression faster than almost any other country in the world. "The Index", a magazine published by a New York trust company on "Sweden a Nation of Market Economic Stability," points out that this recovery is largely due to "the marked success of certain experiments in social planning and co-operative organization, and to the establishment of state monopolies and of managed currency." The article says that the Swedish co-operative union is in an exceptionally strong position and has contributed notably to the economic stability of the country.

## An Early Pioneer

Jas. McKernan Was Third Man To Join The Mounted Police In 1873

Third man to join the old Royal North West Mounted Police when it was formed in Ottawa in the early 70's, James McKernan, 83, died at Edmonton recently.

Mr. McKernan came west in 1873 and was stationed first at Fort Macleod in the territory now in southern Alberta. On October 13 last while thumbing through his leather-bound diary the old-timer came across this entry written 60 years ago: "Mounted guard for the first time at Fort Macleod to-day . . . home, sweet home."

He settled near old Fort Edmonton in 1882 and in 1885 Mrs. McKernan and their four-year-old child took refuge behind the palisades of the fort then fearing Indian attacks in the rebellion, while Mr. McKernan rode patrol duty 50 miles south to warn settlers that the Indians might attack.

He was born in Richmond, Ont.

## Criticism Often Unjust

The Ottawa Journal says most of us are quick to criticize the police. And our criticism is often unjust. For the miracle of police work, that is organized to-day, is not that so many criminals escape, but that so many are apprehended. The public takes note of the few failures; it forgets the thousands of cases where the police succeed.

## Praise Canadian Actress

Norma Shearer Is Complimented For Her English Diction

London drama critics are complimenting Norma Shearer, Mount screen star, for her English diction.

When it became known a United States motion picture company was filming "The Barretts of Wimpole Street," some fans wrote the newspapers suggesting the king's English probably would be mangled by the American actress chosen to play the difficult role of Elizabeth Barrett.

Then the picture was released in London, with the Canadian actress portraying Miss Barrett. The critic for The Daily Mail suggested in his column that Miss Shearer's accent should be studied by some of the British stars.

## Russia's Giant Gun

"Big Lenin" Made By Creators Of Germany's "Big Bertha"

Batteries of a new gun named Big Lenin, which has a range of twenty-three miles, have been mounted by the Russians at Vladivostok.

It is claimed that this weapon outranges by seven miles the heaviest armament in Japan's capital ships. A mobile battery mounted on trucks can be moved to different points on the railway.

The gun is forty-two feet long and has a special cooling apparatus which enables rapid fire without overheating.

The size of the projectile and the explosives used are carefully guarded secrets.

The gun is the work of German experts, some of whom were responsible for the creation of "Big Bertha," the weapon used to shell Paris at seventy-six miles' range.

## Seem To Have No Limit

Japs Hold First Place For Inventive Genius And Initiation

Our good friends the Japanese appear to have no limits so far as inventive genius is concerned. They have apparently discovered the secret of applying it to the imitation of anything that can possibly be manufactured in their own land.

They have given the world bamboo fountain pens for a few cents; they have exported millions of parasols for a few cents. Now they are shipping tens of thousands of spare automobile parts for a few cents apiece.—Montreal Star.

Commercial canning is one of the oldest of the larger organized industries in Canada. Napoleon is credited as the originator of using air-tight containers for army rations, but the development of the industry is international. In 1860, in France, Francois Appert found that food put in air-tight containers required to be sterilized; an Englishman invented the tin can, and North America practically made canning the great industry it is to-day.

## Shooting The Fog

Secret Chemical Makes Air Clear In Few Seconds

Lighting raids on fog are foreshadowed by a secret chemical to which a trial was given recently. When a typical pea-soup specimen loomed up, engineers, having mounted their "guns," an array of centrifugal pipes suspended thirty feet horizontally above the ground fired streams of this liquid into its midst.

In a few seconds a clear path was blazed in the gloom, and while the chemical attack lasted, every fog particle, as it came within range of 2,000 feet, was brought to earth in the form of water. It is anticipated that aerodromes will be among the first to install this new fog-clearing equipment. Already thousands of pounds are expended annually on special fog signals and guidance signs.

## Learning To Fly Again

Colonel Bishop Is Making New Acquaintance With Controls

There is a pleasant tinge of surprise in the report that Colonel W. A. Bishop, the Canadian aviator who destroyed a large number of enemy aeroplanes during the war and was awarded the V.C., is now learning to fly at Montreal. Apparently the Colonel was one of those who returned from his victories more or less to his Sabine farm. It is said that he has not taken a machine into the air since 1922, and he feels that somebody had better be looking over his shoulder while he comes to terms with the controls again. Well, it is a wise bird that knows when to return to the nest.—Glasgow Herald.

## Remarkable New Aid in Avoiding Colds—Samples Free at Local Druggists

Every Family in This Locality Offered a Free Trial  
Of Vicks Va-tro-nol For Nose and Throat—Also  
Of Its Ideal Companion, Vicks VapoRub

### RESULT OF RESEARCH

New Aid in Preventing Colds  
Leads to Plan for Better  
Control of Colds

### PLAN EASY TO FOLLOW

Years ago, Vicks VapoRub introduced the modern method of treating colds. Now, Vicks Chemists have developed the ideal companion to VapoRub—Vicks Va-tro-nol—the new aid in preventing colds.

These two preparations, together with a few simple rules of health, form the unique Vicks Plan for Better Control of Colds. The helpfulness of Vicks Plan in reducing the number, duration and danger of colds has been clinically tested by practicing physicians. (The Plan is fully explained in each Vicks package.) Here, briefly, is how Vicks Plan works:

#### To Help Prevent Colds

Watch yourself and children after exposure to any condition apt to be followed by a cold—such as: Contact with others having active colds—crowds, public places, stuffy ill-ventilated rooms—sudden changes in temperature, wet or cold, or unaccustomed exposure—excesses in living which lower resistance, such as over-eating, smoking, or drinking—after a hard day when you are overtired.

Then, if you have that stuffy, sneezy, irritation in the nasal passages where most colds start, use Vicks Va-tro-nol at once—just a few drops up each nostril. Used in time Va-tro-nol helps to prevent many annoying colds, and to throw off colds in their early stages.

#### To Help Shorten a Cold

If a cold has developed, or strikes without warning, apply Vicks VapoRub over throat and chest at bedtime. Through the skin, VapoRub acts direct like a poultice. At the same time, its medicated vapors are inhaled with every breath direct to the inflamed air-passages. This combined double action through the skin and membranes—eases difficult breathing—

During the day—any time, any place—use Vicks Va-tro-nol every few hours as needed. This gives you full 24-hour treatment without the risks of constant internal dosing, which so often ruins the digestion—especially of children.

#### Trial Packages Free

Your druggist has free combination packages containing trial sizes of Va-tro-nol and VapoRub—also folder telling how these twin aids to fever and shorter colds are used in Vicks Plan for Better Control of Colds. Ask for yours today, as your druggist's supply is limited.

#### CHAPTER IV.—Continued

Dustin swung about to face a gray little figure that stood at sight of him. Sim Peters had been cashier of the Seco Bank for more than thirty years. Scotch by descent and cautious by nature, only once had he ventured to extend his activities beyond Seco. He was like Kipling's muskrat that at last he tried to master courage to run to the middle of the floor. Peters mustered that courage once . . . and Dustin caught him with a loan of five thousand dollars on his house. That loan saved Peters his bank job but it made him the bond-slave of Sam Dustin.

"Just a moment, Peters. . . ." Dustin drew him aside. "How much money does old man Carr owe the bank? I've got to know." "The bank?" Peters quavered. "He don't owe the bank at all, Mr. Dustin. He did owe the bank but old man Pegram took it up. It's a note and Mr. Pegram's warden's right again."

"Peters said it again and Dustin, sure that he had not misunderstood, let go a smoke-screen of profanity. It was not the jovial profanity of good-nature but the virulent overblow of one who fears he has been hurt and who is not sure of the extent of the injury. In one brief kaleidoscopic moment the failure of his plans seemed sure. If Gerald Keene, the nephew of old Peter Vinton, owned half the Hour-glass then he, Sam Dustin, even if he succeeded in ousting Joe Carr, was only getting a new partner whom he did not even know.

He sized old Peters and whirled him about in the moonlight to face him. There was but one thing to be done. Too much depended on what old Kane knew! That miserable old desert-rat could send him and Spike to jail for a half a lifetime and Joe Carr could keep him out of a fortune. The solution came in a sudden storm of ill-considered impulse.

"If you want to keep a roof over your old wife's head," he snarled, "you buy up for me every scrap of paper that old Carr has signed. I want to own the half-share of the Hour-glass. Get me?"

Peters gaped helplessly at him.

"I mean what I say, you old fool. Where can I find this man Gerald Keene? The man who owns the other half of the Hour-glass?"

"I don't know, Mr. Dustin. I swear I don't. Nobody knows. Even Mr. Carr don't know. He's been tryin' to find him through Mr. Burley of the Drovers Bank in Calo but he wrote us that he was handling Mr. Keene's business and that Mr. Keene was travelling somewhere and couldn't be reached just now."

Dustin granted disbelief but he could do nothing at present. He had plenty of money in the bank and Peters knew it. There was no question of the validity of the checks that Dustin wrote at the hotel desk and passed to the gray-faced little cashier who took it shakily. He pouted it, refused a cigar and headed for the bank feeling like a condemned criminal who has received notice of an unexpected reprieve.

now what to do with it. He's lost a lot of money and needs cash. . . .

"How much is the note for?"

"Old Carr hasn't paid any interest on it for a year. It's about twelve thousand dollars right now. And I'll tell you more. . . ."

Old man Pegram better let go all his money at once as he can.

Old Carr's in a bad way."

"I've got a five thousand dollar note of yours, Peters," he said. "It's secured by this house and lot, eh?"

"Yes, sir. That's so. . . ."

Something hard in his throat seemed to choke the little gray cashier.

"That note of yours is due next week. I want that note of Carr's that Pegram got. See?"

"I . . . sir . . . I, I swear I don't see how I can fix it. It's Mr. Pegram's private business. I . . ."

More than ever did Sim Peters regret that accused flyer in wheat that was to remove him and his old wife from any danger of poverty. He made one final wriggle for escape.

"As matters stand, I don't see how it can help you to own a half share of the Hour-glass ranch," he said.

"Half of it! You've a plain fool, Peters. I'll own the whole place. Soda Springs and all," he added. "Old man Carr owns the Hour-glass, don't he?"

"He owns half of it," said Peters. "That's all. When old man Peter Vinton died, he left the Hour-glass half to Joe Carr, his old partner, and half to his sister's son, one Gerald Keene. When Carr wanted to borrow on his half of the place, we had to look up the will. That's how I know I saw the will. It says that if either Carr or Keene dies, his half goes to the survivor. . . ."

"For the love of God! . . ." Dustin was breathless. . . . "Say that again."

"Peters said it again and Dustin, sure that he had not misunderstood, let go a smoke-screen of profanity. It was not the jovial profanity of good-nature but the virulent overblow of one who fears he has been hurt and who is not sure of the extent of the injury. In one brief kaleidoscopic moment the failure of his plans seemed sure. If Gerald Keene, the nephew of old Peter Vinton, owned half the Hour-glass then he, Sam Dustin, even if he succeeded in ousting Joe Carr, was only getting a new partner whom he did not even know.

He sized old Peters and whirled him about in the moonlight to face him. There was but one thing to be done. Too much depended on what old Kane knew! That miserable old desert-rat could send him and Spike to jail for a half a lifetime and Joe Carr could keep him out of a fortune. The solution came in a sudden storm of ill-considered impulse.

"If you want to keep a roof over your old wife's head," he snarled, "you buy up for me every scrap of paper that old Carr has signed. I want to own the half-share of the Hour-glass. Get me?"

Peters gaped helplessly at him.

"I mean what I say, you old fool. Where can I find this man Gerald Keene? The man who owns the other half of the Hour-glass?"

"I don't know, Mr. Dustin. I swear I don't. Nobody knows. Even Mr. Carr don't know. He's been tryin' to find him through Mr. Burley of the Drovers Bank in Calo but he wrote us that he was handling Mr. Keene's business and that Mr. Keene was travelling somewhere and couldn't be reached just now."

Dustin granted disbelief but he could do nothing at present. He had plenty of money in the bank and Peters knew it. There was no question of the validity of the checks that Dustin wrote at the hotel desk and passed to the gray-faced little cashier who took it shakily. He pouted it, refused a cigar and headed for the bank feeling like a condemned criminal who has received notice of an unexpected reprieve.

"Peters said it again and Dustin, sure that he had not misunderstood, let go a smoke-screen of profanity. It was not the jovial profanity of good-nature but the virulent overblow of one who fears he has been hurt and who is not sure of the extent of the injury. "I'm sorry for old Carr," he muttered; "but I can't help it. I can't see Mama go to the Poorhouse and that's what'll happen if Dustin sues out that note. Oh, hell! What's the use kickin'. But I wish I could put a spoke in Dustin's wheel. . . ."

He saw Pegram at the bank who was only too glad to get rid of Carr's note for Dustin's check and he turned that over to Dustin who promptly headed back for the Broken Spur. He found Spike anxiously awaiting him and he was drawn into the office by a nod from his partner.

"What luck, Sam?"

"The best in the world except for one thing. I found out that old Carr does not own all the Hour-glass. He owns half of it. The other half belongs to one Gerald Keene, nephew of old Peter Vinton. If either Carr or Keene dies, the other gets the whole place. . . ."

"Well?" said Spike who saw no further than the end of his nose.

"You call it well, do you? Damned if I do. I can't get at this man Keene. No one seems to know his address. If I could find him, I'd offer to buy his share of the Hour-glass. One thing is sure now, though. We've simply got to find out from old Dad Kane the exact place where he located that ore."

"I hope you can shut his damned mouth," said Spike passionately. "Ed. Raynor, the tax collector, was here for grub and old man Kane began shootin' off his face. He was stringin' in' Gay and Corse about what 'e

seen 'em doing up in the hills. I headed him off in time and I don't think Raynor caught on to what he was sayin'. . . . What you got to do?" he asked sharply for Dustin, with a sharp little oath, was heading for the bunk-house.

Old Dad Kane, standing just inside the door, was suddenly snatched off his feet and was sent spinning against the wall. He turned like a flash and a rusty old six-gun, a cap and ball affair, was thrust under Dustin's nose.

"You keep yore hands where they're used to bein'. . . . In other men's pockets," snapped the old prospector. "What you want? Hey?"

"To shut your fool head and to keep you from lettin' all the world in on what you found. You damned old fool! Don't you know that one word from Ed. Raynor'll send a hun-

dred men up Red Water? Come into the house. I want to talk to you."

Wholly angry, sweating, heathen threats at every pore, Kane followed Dustin into the office. Once in the room Dustin turned on him:

"Look here, Dad. . . ." His very tone was pleading for he had time to reflect. . . . "It's all my fault. I just couldn't stand seein' our one chance of a fortune go glimmerin' just because you talk too damned much. I don't know just what you said but I do know that after a long time in the hills most men's jaws relax. You mustn't give any one even a hint that you found pay-dirt in the hills. If you do, we're busted. You know well enough that one word of gold in Red Water will start a stampede up there. Where'll we be then?"

## GENERAL MEET LIVESTOCK MEN CALGARY NOV. 8

Organizations Asked to Send Representatives—Marketing Scheme Up

EDMONTON, Nov. 1.—Announcement is made of a general meeting of Alberta livestock production interests on Thursday, Nov. 8 in Calgary, for the consideration of a marketing scheme for the province under the Natural Products Marketing Act.

First step in the formation of such a scheme was taken in Edmonton on October 17 and 18 when a committee of 11 men representative of all kinds of livestock production in Alberta, named by Hon. P. S. Grisdale, studied the entire question of marketing in relation to the marketing act and endorsed the general principles of the new federal legislation. This committee also prepared a scheme, as required by the Act, and it is this scheme the livestock growers of the province will have an opportunity to endorse or reject at the Calgary meeting on November 8.

All known livestock organizations have been invited to send representatives to this meeting. E. W. Brunsden, secretary to the Provincial Livestock Marketing Committee advises, and no restriction has been placed on the number of delegates each organization may send.

Officers of organizations which have been inadvertently overlooked are invited to accept this invitation and send their delegates to the Calgary meeting. In addition, livestock producers unaffiliated with existing groups or associations are urged to attend in order that the meeting may be as completely representative as possible, Mr. Brunsden states.

Every opportunity will be given for a full and frank discussion of the Natural Products Marketing Act and the proposed Alberta livestock marketing scheme, the secretary points out, but the committee members are desirous of emphasizing that this meeting is essentially a producers' meeting.

The general meeting will be held in the Al Azhar Temple, corner of seventh Ave. and Fourth St. west, Calgary, and will be convened promptly at 1:30 p.m. on November 8.

Lorne Proudfoot M. L. A. returned from Edmonton Sunday morning.

A number of the girls met at the home of Mrs. Turple last Friday evening for the purpose of organizing a C. G. I. T. group. Mrs. Turple acted as Chairman for the evening. Joyce Milligan was elected president, Lorna Gilbertson secretary. It was decided to have four leaders Mrs. Ridout, Mrs. Turple, Miss Jensen and Mrs. Mackenzie. The meetings will be held every Friday, the next to be held at the home of Mrs. Ridout.

The latest novel gift sent Lord Baden-Powell, the recipient of numerous such tributes from the youth of the world, was a scarf made of sheep's wool gathered from hedges, spun into yarn and colored with dark dye. It came from school children of Ashley Green, Buckinghamshire.

THE ADVANCE  
WEATHER BULLETIN

Monday, Nov. 5, 1934—Clear in most of central sections but probably some rain, snow and strong winds in southwest and on Pacific slope.

Tuesday, Nov. 6—Unsettled in southwest, light precipitation and somewhat blustery, but much of central regions clearing and temperatures declining.

Wednesday, Nov. 7—In southwest and also along southeastern borders somewhat unsettled, with light precipitation and mildly stormy, in north clear, cold.

Thursday, Nov. 8—Remains unsettled about Pacific southwest; also near Great Lakes regions, but in north and northwest clear and cold.

Friday, Nov. 9—Exceptionally mild disturbance and unsettled condition in southwest and on Pacific slope should be fairly clear and quite cold for the season.

Saturday, Nov. 10—The disturbance with some precipitation, drifts along southern borders to southeastern sections; in west and northwest cold moderates very much.

Sunday, Nov. 11—Clearing excepting in few scattered spots; from northwest and west a wave of moderating weather, though probably not very much precipitation.

Week of Nov. 5 to 11, 1934, in central provinces begins with fairly clear weather in most sections, but with declining temperatures. Most of the unsettled weather and precipitation is expected to be on Pacific slope and in southwest of central provinces, though near end of week mildly stormy condition probably drifts along southern borders to southeast. The coldest days are indicated as about the 8th and 9th, but by the 11th there should be much higher temperatures everywhere. Less than normal precipitation in the north, but probably up to the season's normal on Pacific slope and southwest central.

This is the cold snap that quite often comes the first of November and in most sections severe freezing is expected, but immediately following the cold days of mid week there should be a considerable change to very mild milder weather. It comes on with some disturbance on the Pacific slope, where unusually heavy rains are indicated. Later in the week the unsettled conditions on the slope and in southwest central sections will probably drift into the form of scattering flurries along southern borders to Great Lakes regions and east. North of the Saskatchewan river basin mostly clear and cold this week.

For week beginning Nov. 5, 1934.

## RAINFALL IN NEXT FEW YEARS

(By L. H. Weston)

Brightwood, Station, Washington, D.C. On what is called the Piedmont Plateau, meaning simply the flat sloping country between the Appalachian mountains and the central Atlantic shore line, more than the total yearly average amount of rain fell in the first 9 months of 1934, and more than a third of this fell in the first part of September. In September there was more than five times the normal amount of rain, it being by far the greatest. September rainfall ever recorded and the greatest amount that ever fell in any one calendar month. This is positive evidence that the rainfall in these regions is now slowly increasing year by year, almost exactly in accord with certain special

calculations made some twenty years ago in order to determine this point, the computations extending to the year 1970, which, the charted curve indicates, will be a central year in a great drought period. About the year 1948 there will be many great and absolutely excessive rains in this region, according to the computed rain curve carried forward to that year.

West of the Mississippi river this increasing rainfall will also be experienced, but with about a 2 or 3 year lag, and from 1955 to 1958 it seems highly probable all the great central valley regions from the Gulf of Mexico to the Saskatchewan river basin of central Canada will get fully normal or more than normal rainfall, yet about 1943 experience another dry spell.

Special calculations are now being carried forward to the year 1970 for the Mississippi, Missouri and Saskatchewan river valleys. These will probably be completed and published within the next year or two.
